Highly qualified, dedicated and results-oriented junior software developer with years of proven success in front and backend software development. I strive for the impossible and love to create, design and fix software challenges. I have excellent communication and adaptability skills in challenging environments. Seeking to capitalize on my exceptional ability to plan, operate, multitask, organize, coordinate, and implement practices and procedures to make significant improvements in processes that will lead to the successful achievement of organizational objectives.

Projects

Microsoft Access Developer | *Temposonics, Cary NC* **Jan 2019 - Present**

Project Main Components: SQL, Microsoft Access

- Created forms, queries, and dashboards in Microsoft Access with Visual Code for frontend users.
- Created, edited, and fixed backend tables on workplace server domain in SQL.
- Design the company shipping label for domestic and international shipments.
- Provided data analytics based on the duration of the job and units packed to group leaders, supervisors, and managers.
- Fixed bugs and added features on demand to maintain stability to further increase speed and efficiency.

HTML/CV Resume | *Home, Norlina NC* **Nov 2022**

Project Main Components: HTML, Bootstrap 4/5, CSS

- Mocked the same color and tweaked style from my own personal resume into a web page.
