Highly qualified, dedicated and results-oriented junior software developer with years of proven success in front and backend software development. I strive for the impossible and love to create, design and fix software challenges. I have excellent communication and adaptability skills in challenging environments. Seeking to capitalize on my exceptional ability to plan, operate, multitask, organize, coordinate, and implement practices and procedures to make significant improvements in processes that will lead to the successful achievement of organizational objectives.

PROJECTS

Microsoft Access Developer | *Temposonics, Cary NC*   **Jan 2019 - Present**
Project Main Components: SQL, Microsoft Access
- Created forms and queries in Microsoft Access within Visual Basic Code.
  (If and statements, functions, input box, loops, concatenation and calling other applications was used.)
- Created, edited, and fixed backend tables on workplace server domain in SQL
- Design the company shipping label for domestic and displayed line items to the distinctive package on most international shipments.
- Create a dashboard for data searches and analytics based on the duration of the job and items shipped. Group leaders, supervisors, and managers are able resolve issues quicker and see a breakdown of the daily operation, in minutes, hours, days, weekly, monthly, quarterly and yearly.
- Show how to use the application, fixed bugs and added features on demand to maintain stability to further increase speed and efficiency.

HTML/CV Resume | *Home, Norlina NC*   **Nov 2022**
Project Main Components: HTML, Bootstrap 4/5, CSS
- Mocked the same color and tweaked style from my own personal resume into a web page.
